

WELCOME

WHARTON FAMILIES:
SUMMER WEBINAR SERIES

Wednesday, July 15

The Future of Big Data
with Professor Eric Bradlow

Vice Dean of Analytics, The Wharton School

K.P. Chao Professor

Professor of Marketing, Economics, Education, and Statistics

Chairperson, Wharton Marketing Department

Wharton
UNIVERSITY of PENNSYLVANIA

MORE THAN EVER
Our Campaign

How do you compute
corporate profits?

The New Business Era:
Making Profit One
Customer At a Time

Product Centricity v Customer Centricity

$$\sum_{products} (\text{Revenue} - \text{Cost}) = \sum_{customers} (\text{Revenue} - \text{Cost})$$

- CLV is King
- Fire customers!
- Rank-order customers
- Find valuable customers and “print” millions of them!

Radically new data sets in business

What is This?

Right, it's a data-collection device to help firms understand what products a given consumer has bought

What is This?

Right, it's a data-collection device to help you assess the products that customers are looking at and what products they may be interested in

24 Annual Student Programs
1,100 Analytics Clubs Membership
2,000+ Students Engaged
500+ Online Course Enrollments

COMPANY

The Barnes Foundation is an art collection and educational institution promoting the appreciation of art in horticulture in downtown Philadelphia.

PROJECT

Students developed an integrated predictive analytics model that could inform pricing, attendance behavior revenue, and programs.

OUTCOME

Pricing, Customer Segmentation, and Regression Analysis

- **Business Implications:** Development of demand-forecasting models to capture variation in changes in visitation for members and non-members, special exhibitions, seasonality and discounts.

For more information about this research project and data, [click here](#).

Corporate Partners

Inputs into Models (Data)

- **Economists often turn to insights from other disciplines about human behavioral biases at individual levels instead of merely studying (and relying on) past patterns in macro data.**
 - Example: Are households “beta-delta” discounters? i.e., place little weight on future
 - Lots of evidence that it holds in SR. However, now considered irrelevant
- **Some data sources we (PWBM) and other economic modelers use:**
 - **Household survey data**: Census’ American Community Survey and Current Population Survey, U. of Michigan’s Panel Study of Income Dynamics, Federal Reserve Board’s Survey of Consumer Finances.
 - **Administrative data**: Social Security Administration (Office of the Chief Actuary), Internal Revenue Service (Statistics of Income), Centers for Medicare & Medicaid Services.
 - **Firm level data**: Census, BEA, BLS and many other sources.
 - But for COVID-19, we radically expanded to get private data at county / daily level.

COMPANY

Reed Smith is a dynamic international law firm, dedicated to helping clients move their businesses forward. Its long-standing relationships, international outlook and collaborative structure make it a go-to partner for speedy resolution of complex disputes, transactions, and regulatory matters.

PROJECT

Students developed machine learning models and a methodology to fill in missing data to determine budget fees and billing rates and to predict future case activities and tasks.

OUTCOME

Clustering Methodologies and Regression Analysis

- **Business Implications:** Methods to cluster both categorical and continuous data and implementation of models to predict fee budgets and billing fee rates for clients.

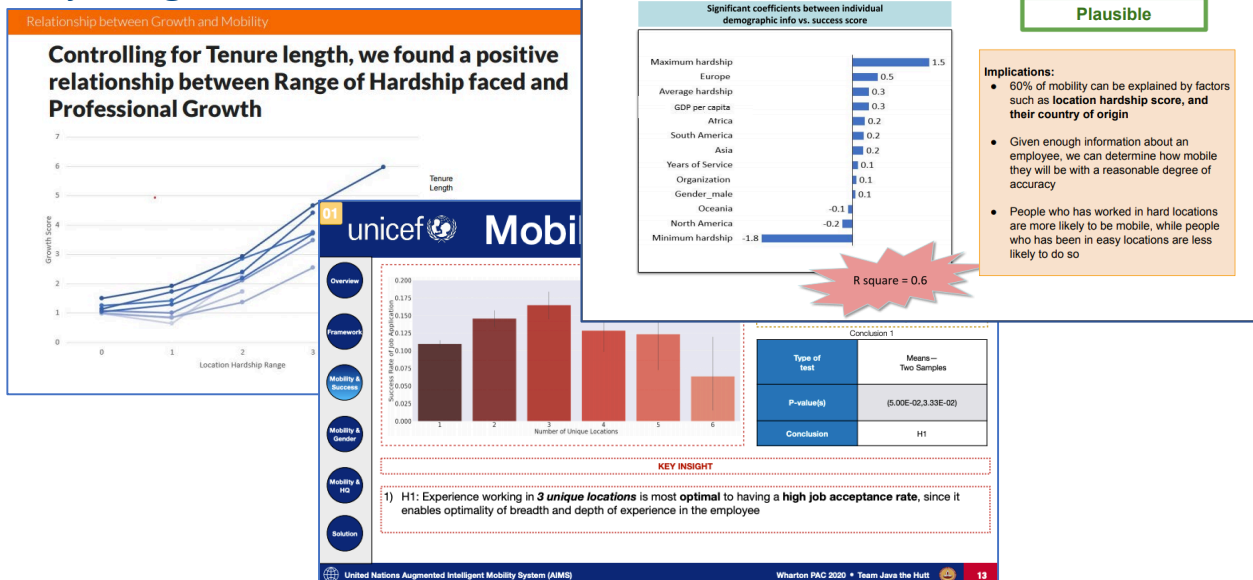

For more information about this research project and data, [click here](#).

Partnered with **United Nations** for 2020 Case Competition

Data on patterns of **staff mobility**

- What is impact on an individual's career advancement?
- Are there differences between genders and other?
- Which mobility systems are more beneficial?

Key insights from winners

Adam Grant with Marcus Buckingham

(CEO keynotes can be engaging, even when not enjoyed)

NEUROSCIENCE Initiative

Students are welcome, encouraged, and become integral to all Wharton Neuroscience research projects (learn more: <https://neuro.wharton.upenn.edu/education/>)

Integrating tracking data provided experience snapshots in key conference locations and events

Wharton Neuroscience is always looking for corporate partners to share ideas and collaborate on innovative projects (learn more: <https://neuro.wharton.upenn.edu/partners/>)

questionnaires.

Undergraduate Seminar: **Sports Research Group**

- Small group discussions with faculty
- Individual project work
- Coffee chats with analysts from pro teams

**Individual Project Work Example:
Baseball - PlayerELO Project**

- Innovative expansion of the ELO rating system generated new insights
- Evaluated individual players in baseball enabling forecasts
- Accounted for variability in competition

Note: the student subsequently published a paper on this and interns w/ the New York Mets - [link to full paper](#)

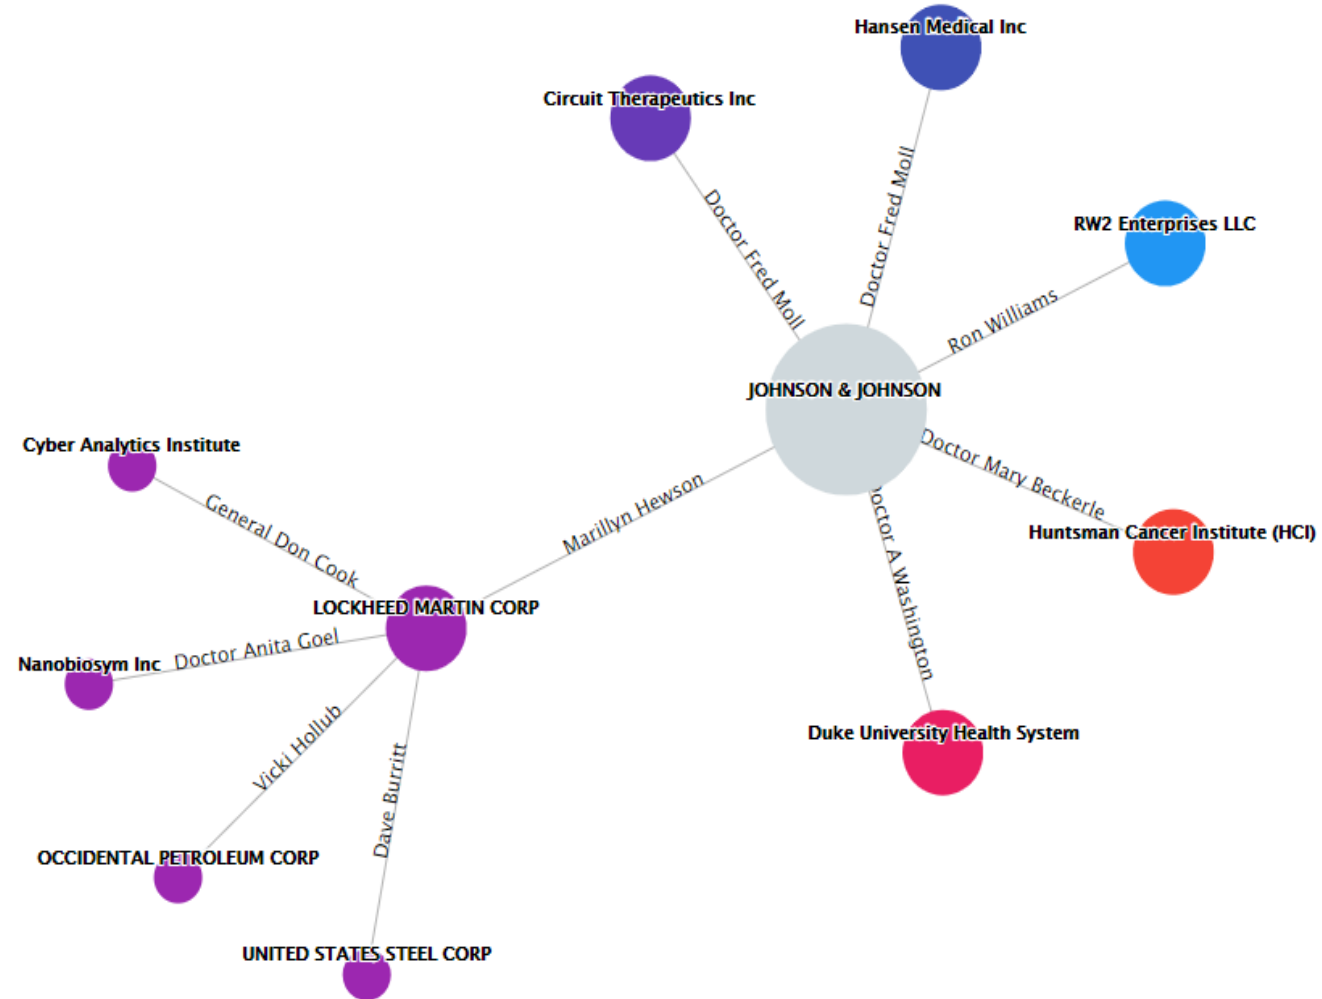

Seminar students share research at CMU Conference
