

WHARTON ACADEMIC RESEARCH BUILDING

The Hub of Analytics

Wharton
UNIVERSITY of PENNSYLVANIA

Inspire.
Achieve.
Scale.

The Wharton School is committed to providing critical space for research innovations and flexible, world-class learning spaces for the next generation of business leaders. The new Wharton Academic Research Building provides an ideal environment for academic instruction, collaboration, and research.

A STATE-OF-THE-ART ACADEMIC CENTER

The building provides mixed-use space for Wharton faculty, students, and research programs, including those focused on data, analytics, and behavior. Communal areas foster social gathering for students and convert into a reception-style layout for events and lectures. The top floors provide administrative space.

A FACILITY TO ADVANCE ACTIVE LEARNING

Technologically advanced classrooms and student workspaces dedicated to cutting-edge learning and teaching methods promote teamwork, problem solving, and experiential learning. There are a series of active learning classrooms, research spaces, conference rooms, and group study rooms, among other venues for Wharton community members to engage and connect.

A PRIME LOCATION ON CAMPUS

Located in the bustling heart of campus, the building creates a gateway both to the main campus and to Wharton's western precinct of buildings and spaces.
